VOTE REPORTER

STREAMLINE, ANALYZE, AND REPORT WITH PRECISION

EXECUTIVE SUMMARY

Vote Reporter™ by International Roll-Call® Corporation is a purpose-built legislative reporting solution designed to enhance the transparency, efficiency, and institutional memory of legislative bodies. Fully integrated with IRC's xmLegislator™ Voting Software, Vote Reporter empowers legislative staff to create and publish detailed reports derived from real-time voting data. With support for cross-session analytics, customizable filters, and seamless journal compilation, Vote Reporter is trusted by multiple state legislatures to deliver reliable, actionable insights into member activity and legislative decision-making.

PRODUCT OVERVIEW

Vote Reporter functions as a secure, flexible, and highly configurable reporting platform tailored to the specific operational needs of legislative chambers. Built on the same technological foundation as xmLegislator™, the software provides a consistent user experience while extending the core system's reporting capabilities.

Vote Reporter enables the generation of a wide variety of reports based on legislative actions, including votes on bills, resolutions, motions, amendments, and other parliamentary activities. Its modular structure allows for easy scalability and user-specific licensing, making it suitable for presiding officers, clerks, analysts, and communications personnel alike.

KEY FEATURES

1 Comprehensive Report Generation

Vote Reporter allows users to generate highly detailed reports using data captured during live or archived voting sessions. Common reports include:

- Member Vote History (individual or group)
- Attendance Reports and Statistics
- Roll-Call Transcripts
- Member Voting Comparisons
- Legislative Day and Journal Page Summaries

Reports can be filtered by a wide array of parameters, including session, member, vote outcome, bill number, amendment, reading number, date, motion type, journal page, and more. These tools ensure that staff can meet internal analysis needs as well as external reporting requirements with ease and accuracy.

2 Cross-Session Historical Reporting

Vote Reporter provides cross-session analysis by enabling users to generate historical voting records for individual members or selected groups, facilitating year-over-year comparisons, longitudinal studies, and member performance reviews.

3 Seamless Integration with xmLegislator™

Vote Reporter is fully integrated with IRC's xmLegislator™ Voting Software, ensuring immediate access to voting data as it is recorded. This integration streamlines report creation, supports automated journal compilation, and reduces the possibility of error through manual data transfer.

4 Customizable Licensing and Access

While Vote Reporter is most frequently deployed to the Presiding Officer and/or Vote Operator, IRC offers additional user licenses tailored to each client's operational structure. The software can be installed on any authorized workstation, inside or outside of the chamber, and configured for administrative, support, or archival use as needed.

TECHNICAL SPECIFICATIONS >>>

To ensure successful implementation and operation, the following technical infrastructure must be provided:

- Workstation withremote access capabilities
- .NET Framework 4.8 or later
- Microsoft SQLServer 2016 or later
- Admin-level user account and necessary power/network connectivity

IRC Implementation Support Includes:

- Installation and configuration of the latest Vote Reporter version
- Operational testing and troubleshooting
- Basic user training for designated personnel
- Coordination of a final acceptance test with legislative staff

IMPLEMENTATION AND SUPPORT >>>

Each Vote Reporter system includes professional services and direct support from an IRC Product Specialist. Services are delivered remotely and encompass full software setup, environment configuration, and initial end-user orientation. IRC also provides ongoing support and software updates to ensure long-term product performance.

PROVEN TRACK RECORD >>>

Vote Reporter is currently in use by legislative bodies in:

- KANSAS
- MAINE
- OHIO
- OKLAHOMA
- TEXAS

These institutions depend on Vote Reporter to simplify report generation, maintain data integrity, and deliver consistent transparency to their members, stakeholders, and the public.
